EDUCATION

Chandigarh Group of Colleges

B.Tech in Computer Science and Engineering (CSE)

CGPA: 8.09/10

Landran (Mohali), Punjab

July 2018 - June 2022

SKILLS

Programming Languages:	JavaScript, TypeScript, Java
Libraries/Frameworks:	ReactJs, SpringBoot, Hibernate/JPA, NodeJs, ExpressJs, React-Redux, Tailwind CSS, Material UI
Tools / Platforms:	AWS, Git, GitHub, Maven, PostMan, VS Code
Databases:	MongoDB, MySQL

WORK EXPERIENCE

Wipro | Software Engineer

Bengaluru, Karnataka | June 2024 - Present

- **HP Inc:** Developed and integrated multiple UI pages and Micro Frontends using ReactJS and Figma designs, improving modularity and maintainability.
- Built RESTful APIs with SpringBoot and MongoDB, reducing API response time by 20% through optimized query handling.
- Led backend dependency upgrades and version migrations, improving application security and stability by 90%.
- Enhanced system reliability by resolving critical production issues via thorough debugging and root cause analysis
- Boosted page load speed by 30% by implementing lazy loading, optimizing image rendering, and refining UI performance.
- Gained exposure to MCP (Model Context Protocol) servers, understanding their role in enabling AI-driven workflows and backend integrations.

Cognizant Technology Solutions | Jr. Software Engineer

Noida, UP | July 2022 - June 2024

- **Elevance Health:** Improved system efficiency by 16% by optimizing backend services and migrating class components to functional components for better scalability in a MERN stack application.
- Designed and developed RESTful APIs and integrated them with a real-time monitoring dashboard, enhancing data transparency and user experience; achieved 90% test coverage using TDD and React Testing Library.
- **Reduced page load times by 25%** by implementing code-splitting, lazy loading, and React performance optimizations.
- Enhanced application reliability by implementing TDD practices across both frontend and backend, achieving 90% test coverage using React Testing Library and backend testing frameworks.
- Collaborated on database design and query optimization (MongoDB), improving data access performance and overall system scalability.

PROJECTS

- **Healthcare Appointment System | Link:** Built a full-stack healthcare scheduling app using React, Node.js, Express.js, and MongoDB; reduced API response latency by 35% through optimized MongoDB queries and implemented secure user authentication using JWT.
- **Netflix Clone | Link:** Engineered a Netflix-style web app with MERN stack featuring dynamic movie rendering and video previews; improved bundle size by 20% via code-splitting and lazy loading.

CERTIFICATIONS

- React Certification - Udemy
- JavaScript Basics Certification - Udemy
- Microsoft Azure Fundamentals - Microsoft
