Portfolio | LeetCode | LinkedIn | GitHub

EDUCATION

Chandigarh Group of Colleges

B.Tech in Computer Science and Engineering (CSE)

CGPA: 8.09/10

Landran (Mohali), Punjab

July 2018 - June 2022

SKILLS

Programming Languages: JavaScript, C++, TypeScript
Libraries/Frameworks: NodeJs, ReactJs, ExpressJs, React-Redux, Tailwind CSS, Material UI
Tools / Platforms: AWS, Git, GitHub, PostMan, VS Code
Databases: MySQL, MongoDB

WORK EXPERIENCE

Wipro | Software Engineer

Bengaluru, Karnataka | June 2024 - Present

- Developed and integrated multiple UI pages and Micro Frontends using ReactJS and Figma designs, **improving modularity and maintainability**.
- Built RESTful APIs with Express.js and MongoDB, **reducing API response time by 20%** through **optimized query handling**.
- Led dependency upgrades, **improving application security and stability by 90%**.
- Enhanced system reliability by **resolving critical production issues** via thorough debugging and root cause analysis.
- Boosted page **load speed by 30%** by implementing **lazy loading**, **optimizing image rendering**, and **refining UI performance**.

Cognizant Technology Solutions | Jr. Software Engineer

Noida, UP | July 2022 - June 2024

- Elevance Health (May 2023 – Jun 2024):** Led a MERN stack project that **improved system efficiency by 16%** by optimizing code and migrating class components to functional components for better scalability.
- Designed a real-time monitoring dashboard that enhanced data transparency and user experience; **achieved 90% test coverage** using TDD and React Testing Library.
- Reduced page load times by 25%** by implementing code-splitting and React performance optimizations.
- Alm. Brand Group (Aug 2022 – May 2023):** **Improved OS platform functionality by 15%** through C++ feature development and resolved critical bugs, **reducing service disruptions by 25%**.
- Delivered customer-requested enhancements (RFEs), **decreasing reported issues by 40%** and **boosting customer retention by 20%**.
- Collaborated with global teams to reduce **issue resolution time by 50%** and **increased code coverage by 40%** through rigorous unit and functional testing.

PROJECTS / OPEN-SOURCE

- Healthcare Appointment System | Link:** Built a full-stack healthcare scheduling app using **React, Node.js, Express.js, and MongoDB**; **reduced API response latency by 35%** through optimized MongoDB queries and implemented secure user authentication using JWT.
- Netflix Clone | Link:** Engineered a Netflix-style web app with **MERN stack** featuring dynamic movie rendering and video previews; **improved bundle size by 20%** via code-splitting and lazy loading.
- Movix App | Link:** Developed a movie browsing app using **React.js, Tailwind CSS, and Firebase**; achieved sub-200ms search response time and **reduced initial page load by 30%** using efficient image optimization and modular components.

CERTIFICATIONS

- React Certification - **Udemy**
- JavaScript Basics Certification - **Udemy**
- Microsoft Azure Fundamentals - **Microsoft**
